

Steel detailing. From model to shop.

Project information for fabrication and field use.

MOODY ELEMENTARY SCHOOL / PORT MOODY, CANADA

Founded in 2005, Caliber Tech Solutions prepares structural steel models, shop and erection drawings, and fabrication information for building and industrial projects.

WHAT WE DELIVER

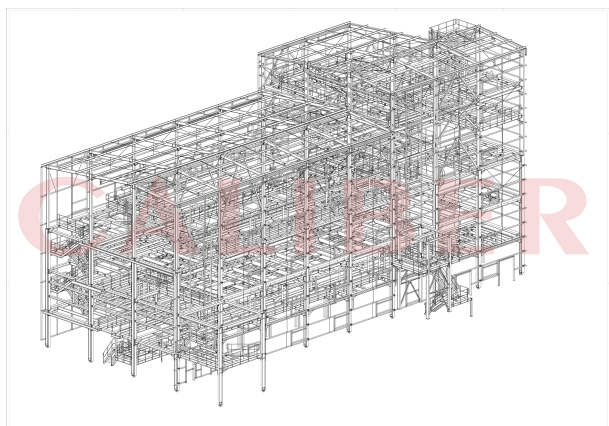

3D modelling in Tekla Structures
Shop, part, assembly and erection drawings
CNC, DXF and agreed fabrication outputs

Part lists and shop / field bolt lists
Automated model reports
Engineering where included in the agreed scope

Commercial / Industrial / Education / Infrastructure

Work with context.

Selected examples of Caliber's structural steel project experience.

RAS LAFFAN OLEFIN BUILDING

Ras Laffan, Qatar / Industrial

3D modelling, shop and erection drawings, and agreed fabrication files and reports. The model and construction photograph show two views of the project.

CHARLES DE GAULLE AIRPORT EXPANSION

France / Infrastructure

Airport steelwork during construction, photographed in Caliber's earlier project gallery.

Images identify project experience; they do not imply responsibility for the complete development.

Your scope. Our next conversation.

Share the drawings, required outputs and target dates. We can review your requirements and discuss the detailing and engineering support your project needs.

01 Define the scope

Review drawings, responsibilities, engineering requirements and the information available.

02 Agree the delivery

Confirm outputs, submission stages and target dates for the agreed package.

03 Coordinate and release

Develop the model and drawings, resolve queries and incorporate review comments before the agreed fabrication release.

Discuss your project.
